

# C132R

## 3/4" Manual Squeeze Off Tool

The Model C132R Squeeze Off Tool is designed to squeeze 1/2" to 3/4" PE pipe. The C132R features a positive clamp style, with fixed gap squeeze settings to ensure that the gas line is completely closed off without damage. It's lightweight, compact size and many uses makes this tool a great addition to service line work. The C132R also offers a static electricity grounding spike to ensure safety during the squeeze process.
